## **DETAILED ACTION**

### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 11-26 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 8, and 11-13 of U.S. Patent No. 6,126,631 to Loggie. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant application's independent claim simply recites a broader embodiment of the previously patented invention. The dependent claims of the instant invention can be matched with claimed limitations in the patented invention.

### ***Election/Restrictions***

3. Claims 1-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or

Art Unit: 3762

linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 8.

4. Applicant's election with traverse of claims 11-26 in Paper No. 8 is acknowledged. The traversal is on the ground(s) that the claimed "species" are similar in scope and do not put a serious burden on the examiner. This is not found persuasive because the examiner did not restrict the inventions between "species" as argued by applicant. The restriction requirement was made between two separate inventions that are not disclosed as being capable of use together. Since the two inventions are distinct, they are eligible for restriction, since searching two separate inventions in a single application is an undue burden on the examiner.

The requirement is still deemed proper and is therefore made FINAL.
